

SEE THINGS COMING

Equipped with the right tools, nothing escapes your attention and you're always ready to respond to changing conditions. Knowing the status of your compressed air equipment at all times is the surest way to achieve optimal efficiency and maximum availability.

Atlas Copco

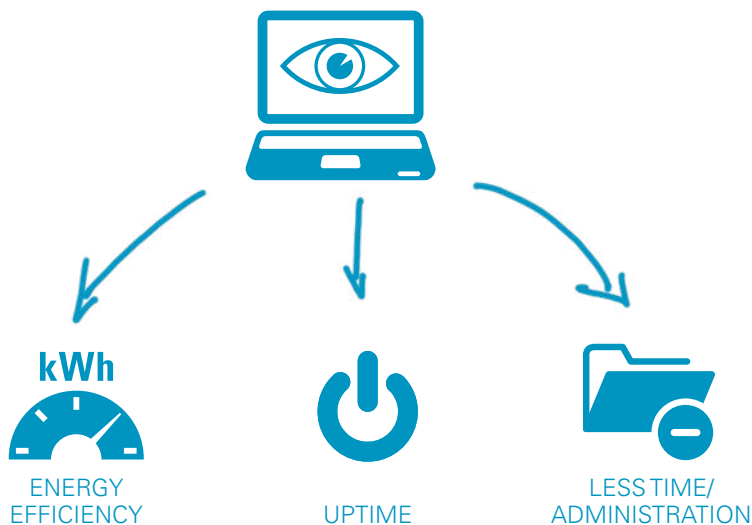

Valuable insight

SMARTLINK is Atlas Copco's user-friendly data monitoring system. It gives you remote insight in your compressed air installation, helping to spot developing problems and even showing you the potential for optimization and energy savings.

Learn more about **SMARTLINK** and how it can improve your bottom line.

ASK YOURSELF...

What's the alternative to remote monitoring?

Without connectivity, you have to rely on visits to the compressor room to check the status of your equipment. A logbook will be needed to keep track of running hours and service requirements. **SMARTLINK** gathers and analyses data on the fly, giving you full transparency and – as the administrative burden is minimized – better day to day efficiency.

How does connectivity affect service?

Insufficient monitoring creates a risk of overdue service or premature visits. With **SMARTLINK**, you're always able to schedule maintenance when it's due. All components are replaced on time, ensuring continued energy efficiency and maximum uptime.

What is the risk of a reactive approach?

If a problem goes unnoticed, it may eventually disrupt your production. An emergency repair may lead to unscheduled downtime and high costs. **SMARTLINK** sends out early warnings, allowing you to respond in a planned way.

How useful is constant data gathering?

If you don't know how your system is running, improvements are hard to identify. With the insights offered by **SMARTLINK**, you can optimize your equipment and improve your energy efficiency.

Insight à la carte

Choose from 3 levels of **SMARTLINK** to determine the amount of information you receive.

With **SMARTLINK** Service, a mouse-click reveals the online service log. Get quotes for parts and additional service quickly and easily.

SMARTLINK Uptime additionally sends you an e-mail or text message whenever a warning requires your attention.

SMARTLINK Energy gives you customized reports on the energy efficiency of your compressor room, in compliance with ISO 50001.

“With SMARTLINK, we're truly proactive. Good and easy planning of service interventions means time and money saved.”
